EXPERIENCE

Supermart Express

Frontend Developer (March 2020 - Till date).

- ❖ I improved the **product listing model** by creating a **Product Variants Management System**. I **automated**, thereby **simplified** inventory records taking, by creating an Inventory Management System for the admins.
- ❖ I developed a customizable platform for franchises, collaborated with another mobile Developer to **develop** a mobile application targeted to increase the number of daily orders.
- ❖ I **implemented** global state management in react native with redux and redux-thunk for asynchronous requests. I implemented routing with react-navigation, created both drawer and tab navigation. Also implemented Jest for testing.
- ❖ I **debugged** and **fixed** bugs, did code review and **improved** the user experience and the reliability of our platform.
- ❖ I made it **easier** for the admin to add variants to each product and for the buyers to order for a specific product variant and get their favourite variants.
- ❖ Technologies used are Angular, Vuejs, React Native, Redux, Laravel, Gitlab, AWS.

One kiosk Africa

Fullstack Developer (September 2019 - March 2020)

- ❖ I **optimized** the customer-facing application by 30% by reviewing and refactored the front end codebase, **improving** the company's technology by creating an admin dashboard populated with dynamic data. The functionalities include approval of a new vendor, ban of a vendor, managing stores and products.
- ❖ I **improved** the backend technology by refactoring the logic, handling some endpoints and ensuring the failing tests were passed. Fixed TravisCI and Continuous Delivery Integration issues.
- ❖ The technologies used are Nodejs, Express, React.js, Redux, Github.

Andela Stackup Program

Fullstack Developer(September 2018 - September 2019)

- ❖ I worked on an in-house travelling management application. This application enables a company to track all the staff travelling records.
- ❖ I learned about react tools like Redux.js, Jest, Webpack, Enzyme.js, Restful API and API communication across the internet.
- ❖ I implemented automated testing and units tests with jest and jasmine.
- ❖ The technologies I used are React.js, Redux, Nodejs, Express, Github.

Success Trend Marketing

WordPress Developer(February 2017 - August 2018)

- ❖ I created a number of websites for the company clients with wordPress.
- ❖ I implemented web traffic generation, web hosting, SEO optimization and API integration.
- ❖ I facilitated web training, where I teach wordpress development
- ❖ Technology used are WordPress, Bootstrap.

EDUCATIONAL BACKGROUND

- ❖ Ladoke Akintola University Of Technology (LAUTECH) (2011-2016).
Biochemistry (BTech).

TECHNICAL SKILLS

- ❖ JavaScript, React.js, Angular, Vue.js, Redux.js, JS(es6), TypeScript.
- ❖ Php, Laravel, WordPress.
- ❖ HTML5, CSS3, Bootstrap, Material UI.
- ❖ React Native.
- ❖ Node.js, Express.js, Webpack, Babel, Firestore.
